Entrustable Professional Activity (EPA)
Assessment form

# **EPA 1: Clinical Assessment**

**Note:** This form has been altered to better support paper-based trialling of EPA assessments in 2023 and 2024. This form will be translated into an online version prior to implementation of an e-portfolio. Most of the details in the form will be prepopulated in the e-portfolio or entered by the prevocational doctor.

The purpose of this form is to provide feedback to the prevocational doctor on their performance of an EPA to support their learning and to support assessment review panel decisions about satisfactory completion of PGY1 (the point of general registration) or PGY2. EPAs assessed throughout PGY1 and PGY2 should represent a breadth of experience and a range of task complexities. There is an expectation that there is an increase in the level of complexity of cases across the year and two-year program.

#### **Title**

Conduct a clinical assessment of a patient incorporating history, examination, and formulation of a differential diagnosis and a management plan including appropriate investigations.

### Focus and context

This EPA applies in admission, reviewing a patient on request in response to a particular concern, ward call tasks, ward rounds, lower acuity emergency department presentations, general practice consultations or outpatient clinical attendances.

Perform this activity in multiple settings, including inpatient and ambulatory (including community) care settings or in emergency departments and in the care of different populations for example children, adults and the elderly.

## Description

This activity requires the ability to,	where appropriate or possi	ible complete some or a	all of the following list.	The
prevocational doctor is to tick the t	ask descriptions that are re	elevant to this assessme	ent:	

	1.	if clinical assessment has been requested by a team member, clarify the concern(s) with them
	2.	identify pertinent information in the patient record
	3.	obtain consent from the patient
	4.	obtain a history
	5.	examine the patient
	6.	consider and integrate information from the patient record, clinical assessments, and relevant ward protocols/ guidelines/ literature
	7.	develop provisional and differential diagnoses and/or problem lists
	8.	produce a management plan, confirm with senior colleague as appropriate, and communicate with relevant team members and the patient
	9.	implement management plan, initiate or perform appropriate investigations and procedures, and document assessment and next steps, including indications for follow up
		on 2B of <i>Training and assessment – Training and assessment requirements for prevocational (PGY1 and nining programs</i> for descriptions of behaviours that demonstrate entrustability to the supervisor.

#### **Title**

Recognise, assess, escalate appropriately, and provide immediate management to deteriorating and acutely unwell patients. (This EPA recognises that PGY1/2 doctors often called after hours to assess patients whose situation has acutely changed)

#### **Focus and context**

This EPA applies in any clinical context but the critical aspects that differentiate it from EPA 1 are for the PGY1/PGY2 doctor to:

- 1. Recognise the acutely unwell and or deteriorating patient (including acute deterioration in mental health).
- 2. Act immediately, demonstrating a timely approach to management
- 3. Escalate appropriately

Perform this activity in multiple settings, including inpatient and ambulatory (or community) care settings or in emergency departments, in and after hours, and in the care of different populations for example children, adults and elderly.

### **Description**

This activity requires the ability to, where appropriate or possible complete some or all of the following list. The prevocational doctor is to tick the task descriptions that are relevant to this assessment:

	1.	recognise clinical deterioration or acutely unwell patients
	2.	respond by initiating immediate management, including basic life support if required
	3.	seek appropriate assistance, including following the local process for escalation of care
	4.	communicate critical information in a concise, accurate and timely manner to facilitate decision making
	5.	lead the resuscitation initially, and involve other necessary services, such as intensive care or retrieval services
See	Secti	on 2B for descriptions of behaviours that demonstrate entrustability to the supervisor.

#### **Title**

Appropriately prescribe therapies (drugs, fluids, blood products oxygen) tailored to patients' needs and conditions

### Focus and context

This EPA applies in any clinical context but the critical aspects are to:

- 1. Prescribe autonomously when appropriate, taking account of registration, health service policies, and individual confidence and experience with that drug or product
- 2. Prescribe as directed by a senior team member, taking responsibility for completion of the order to ensure it is both accurate and appropriate in the context of the patient

Perform this activity in multiple settings, including inpatient and ambulatory (or community) care settings or in emergency departments and in the care of different populations for example children, adults and elderly.

# Description

This activity requires the ability to, where appropriate or possible complete some or all of the following list. The	ıe
prevocational doctor is to tick the task descriptions that are relevant to this assessment:	

	1.	obtain and interpret medication histories					
	2.	respond to requests from team members to prescribe medications					
	3.	consider whether a prescription is appropriate					
	4.	choose appropriate medications					
	5.	where appropriate, clarify with the senior medical officers, pharmacists, nursing staff, family members or clinical resources the drug, including name, dose, frequency and duration					
	6.	actively consider drug/ drug interactions and/or allergies and if identified check whether to proceed					
	7.	provide instruction on medication administration effects and adverse effects, using appropriate resources					
	8.	elicit any patient concerns about the benefits and risks, as appropriate seek advice and support to address those concerns					
	9.	write or enter accurate and clear prescriptions or medication charts					
	10.	monitor medications for adverse reactions, efficacy, safety, and concordance					
	11.	review medications and interactions, and cease medications where indicated, in consultation with senior team members, including a pharmacist					
See S	Sectio	on 2B for descriptions of behaviours that demonstrate entrustability to the supervisor.

#### Title

Communicate about patient care, including accurate documentation and written and verbal information to facilitate high quality care at transition points and referral.

### **Focus and context**

This EPA applies to any clinical context but the critical aspects are to:

- 1. Communicate timely, accurate and concise information to facilitate transfer of care across various health sector boundaries including:
  - at referral from ambulatory and community care
  - at admission
  - between clinical services and multidisciplinary teams
  - · at changes of shift
  - at discharge to ambulatory and community care
- 2. Produce timely, accurate and concise documentation of episodes of clinical care

Perform this activity in multiple settings, including inpatient and ambulatory (or community) care settings or in emergency departments and in the care of different populations for example children, adults and elderly.

### **Description**

This activity requires the ability to, where appropriate or possible complete some or all of the following list. The prevocational doctor is to tick the task descriptions that are relevant to this assessment:

- Communicate:
  - facilitate high quality care at any transition point
  - ensure continuity of care
  - share patient information with other health care providers and multidisciplinary teams in conjunction with referral or the transfer of responsibility for patient care
  - use local agreed modes of information transfer, including oral, electronic and written format to communicate (at least):
    - patient demographics
    - concise medical history and relevant physical examination findings
    - current problems and issues
    - details of pertinent and pending investigation results
    - medical and multidisciplinary care plans
    - planned outcomes and indications for follow up
- 2. Document:
  - enable other health professionals to understand the issues and continue care
  - produce written summaries of care, including admission and progress notes, team referrals, discharge summaries, and transfer documentation
  - produce accurate records appropriate for secondary purposes
  - complete accurate medical certificates, death certificates and cremation certificates
  - enable the appropriate use of clinical handover tools

See Section 2B for descriptions of behaviours that demonstrate entrustability to the supervisor.
